

Sources Time Saver Reference- Cut and paste these different ways to source records in "**Where the Record Is Found (Citation)**" in FamilySearch.org depending on the records used. One only needs to change the parish (sogn), possibly district (herred), and county (amt), years of the record, #, and page #. This will make much more sense after reading and practicing on the case study. This was placed at the first of the case study to save time finding them once one starts sourcing.

3. This is just like the old way but the opslag is replaced by #. [AO genvej](#) is useful to find a second copy of a parish record to compare records with illegible handwriting, more clues for witnesses, or more details about the people.

Go to the address above and put the Soro (Amt-County), North Flakkebjerg (Herred- Shire or Judicial District), Eggeslevmagle (Sogn-Parish). This is

from the the year 1840-50 (new), #132 page 150. The men are listed first in this parish record and the women are listed afterwards.

4. Explanation to include in **confirmations**. I don't look for them on everyone. Sometimes they help me solve a mystery like if they were alive at that time or if the parents are listed.

At the conclusion of this Lutheran catechism instruction, young persons traditionally make a public profession of their faith in a public ceremony. Students often begin taking catechism classes at about age twelve and are usually confirmed at age fourteen. Many times the best student is listed first and in order of merit. Many times it will mention if they were well behaved or knowledgeable. Often the kids would leave the home after their confirmation and become an apprentice or become a servant.
